Frameworks: Next.js, Node.js, Express.js, Material-UI

Libraries: React.js, Prisma ORM

APIs: REST APIs, EJS, RESTful APIs

Developer Tools: Git, GitHub, Visual Studio Code, IntelliJ IDEA, WebStorm, Workfront, Workfront Fusion

Other Skills: Sprint Planning, Agile Development, Microservices, Project Management, Stakeholder Management

Experience

Full Stack Developer — iTinker VIADUCT

Jun 2022 – Present

- Designed and built a student collaboration platform with file sharing, note management, real-time communication, and team-based study sessions to enhance productivity.
- Developed Node and Express APIs, optimizing database operations for core functionalities.
- Implemented a responsive web socket system, enabling student interaction through chat features.
- Orchestrated S3 bucket solutions for seamless access and sharing of documents, images, videos, and voice recordings.
- Proficient in Node.js, Express, and database management for scalable and efficient application development.
- Collaborated with UI/UX designers to implement a user-centric interface, enhancing accessibility and engagement for students.

MMTC PAMP

- Created a user-friendly, type-safe interface using React and TypeScript for a precious metals trading platform.
- Built a responsive website with TypeScript and React, ensuring cross-browser compatibility and high code quality.
- Implemented dynamic, real-time updates for trading operations, ensuring a smooth user experience.
- Integrated Razorpay for secure payment processing on the website, streamlining the checkout process.
- Enhanced UI/UX by collaborating with designers and implementing reusable React components, improving user engagement.
- Resolved production issues with QA and backend teams, minimizing downtime and improving stability.

NANO-BASMATI

- Implemented a centralized admin panel to streamline management of users, products, orders, parties, and analytics.
- Integrated order distribution analytics and performance metrics by state and party to enhance sales operations insights.
- Built the web application using Next.js with server-side rendering, improving performance and user experience.
- Improved administrative efficiency through a user-friendly interface designed for intuitive management.
